

coating_sampled.csv

- General Information
 - Number of Observations: 103
 - Number of Columns: 15
 - No Missing Values
 - The time delay between the input feature values and the output feature value has been corrected, so each row now contains the adjusted values.

coating_sampled.csv

- Columns (Features)
 - date: Timestamp of the observation
 - coil: Identifier for the coil
 - target: Target weight
 - thickness: Thickness of the steel strip
 - width: Width of the steel strip
 - speed: Line speed
 - tension: Tension in the steel strip
 - gap_top: Gap between air knife and steel strip (one side: top)
 - gap_bot: Gap between air knife and steel strip (other side: bottom)
 - pressure_top: Air pressure applied to the top side
 - pressure_bot: Air pressure applied to the bottom side
 - angle_top: Air knife angle (one side: top)
 - angle_bot: Air knife angle (other side: bottom)
 - weight_top: Measured coating weight (one side: top)
 - weight_bot: Measured coating weight (other side: bottom)
